

Professional

ModuCourts has more than 20 years' production experience, with our R&D Team, we can provide high quality products all the time.

All weather

Special testing high and low temperature environments. And all surfaces are UV-resistant.

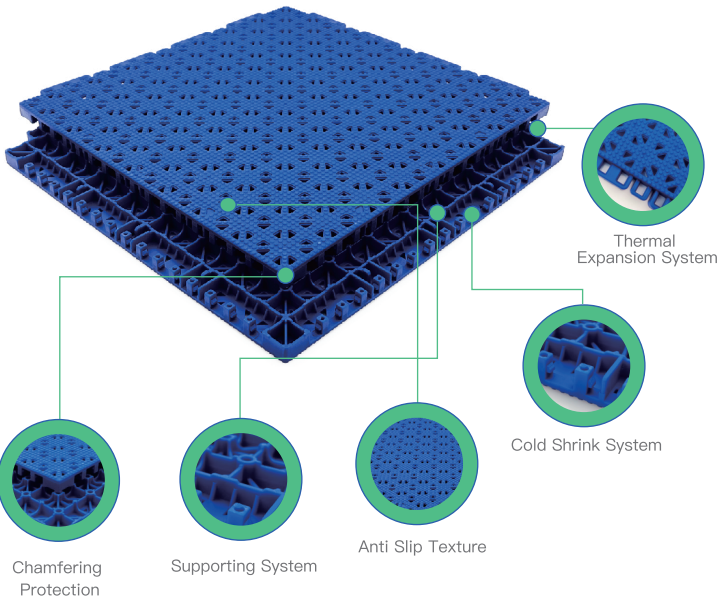

Performance

Unique TPE material can provide excellent ball bounce and shock absorption.

Safest

Soft surface protect players from getting hurt after falling.

Supporting System:

The cross keel design, combined with 98 columns, offers a robust weight-loading capacity while ensuring sufficient ball bounce. The use of TPE materials throughout the structure makes it soft and elastic, providing excellent shock absorption.

Convex Points Surface:

The 5104 convex points enhance grip, offering excellent slip-resistance performance. Additionally, the design's small holes contribute to a more uniform rebound and stable motion trajectory for a smaller ball.

Temperature Adaptation System:

Six groups of elastic arms and 2mm elastic joints afford the tiles ample room for expansion or contraction within a fixed area. This design ensures the tiles will not crack in cold conditions or warp in heat.

Size	304.8*304.8*13mm
Weight	340g
Warranty	15 years
Material	High elastic TPE
Quality	ISO 9001/ISO 14001
Shock Absorption	25%
Ball Rebound	100% ball bounce
Recycling	100% recyclable

AVAILABLE COLORS

LemonYellow	Orange	Garnet
TrinidadBlue	ForestGreen	KnightBlack
WindGrey	Purple	GraphiteGrey
SkyBlue
